The People's Inclusionary Zoning Consultation (survey)

“The City of Toronto is wrapping up its public consultations on Inclusionary Zoning. ACORN, along with many other housing groups and advocates, do not feel that the city actually consulted the people. Rather, it was a top-down lecture from city staff about why the city wants to move forward on a weak Inclusionary Zoning policy… Have your say on what the city should require as affordable housing in new developments.”

Find out more details of the survey and access it [here](#).
